Summary

- Full-Stack Developer skilled in React.js, Node.js, JavaScript, PHP, and MySQL. Experienced in building scalable web applications, RESTful APIs, responsive UIs, and database-driven solutions. Seeking Software Engineer or Full-Stack Developer roles.

PROJECTS

Party Hall Booking System | [GitHub](#) | HTML, CSS, React, Node JS | Feb'26 - Mar'26

- Finding and booking suitable party halls for events can be time-consuming due to scattered information, limited availability tracking, and inefficient booking processes.
- Developed a full-stack Party Hall Booking System using React.js, Node.js, Express.js, MongoDB, and Docker. Built RESTful APIs for authentication, venue management, and bookings, with a responsive UI for seamless venue discovery and reservations.
- Strengthened skills in responsive UI development, reusable components, user interaction handling, Docker containerization, theme toggles, and smooth animations to deliver scalable, user-friendly applications.

Land Tax and Property Management System | [GitHub](#) | HTML, CSS, JS, PHP | Feb'25 - Apr'25

- Land and property record management is often inefficient, with challenges in maintaining accurate data, ensuring secure access, and enabling quick retrieval of records.
- Engineered a full-stack Land & Property Management System using PHP and MySQL, featuring optimized CRUD operations, a normalized database schema, and efficient data handling for fast and reliable record management.
- Enhanced my skills in full-stack development, API design, and database management. Gained hands-on experience in building scalable backend systems, integrating frontend with backend services, and creating efficient, user-friendly booking workflows.

TRAINING

CipherSchools | [Certificate](#) Jun' 25 – Jul' 25

Data Structures using C++

Completed summer training in Data Structures and Algorithms using C++, implementing core data structures including arrays, linked lists, stacks, queues, trees, and graphs. Practiced sorting, searching, recursion, greedy algorithms, and time-space complexity analysis through hands-on coding exercises and mini-projects.

Certificates

- MOOC in Prompt Engineering: ChatGPT, Generative AI & LLM by [Infosys](#) Aug'25
- MOOC in Computational Theory: Language Principle & Finite Automata Theory by [Infosys](#) Aug'25
- MOOC in Privacy and Security in Online Social media by [NPTEL](#) Apr '25

TECHNICAL SKILLS

Languages: Java, JavaScript, PHP, Python
Frontend/ Backend: HTML, CSS, React JS, Node JS
Tools/Database: MySQL, Linux, GIT, Docker
Soft Skill: Problem-Solving, Team Collaboration, Adaptability & Flexibility,

EDUCATION

Lovely Professional University Phagwara, Punjab Aug'23-Present
Bachelor of Technology Computer Science and Engineering CGPA:6.75

Kendriya Vidyalaya No.1 Air force Station Adampur, Punjab Apr'22 – Mar'23
Intermediate; Percentage: 68%

Kendriya Vidyalaya Air force Station Avadi, Tamil Nadu Apr'20 - Mar'21
Matriculation; Percentage: 85%
